Model Validation — Actual vs Forecast

Forecasts were made in advance of March–July 2026, then checked against real MPS data once it was released.

London-wide Total

Actual, SARIMA, Ensemble, and Naive Seasonal (same month, prior year) shown together.

	Month	Actual	Forecast	Pct_Error	Naive_Seasonal
0	2026-03	75137	73103	2.7	
1	2026-04	73990	71817	2.9	
2	2026-05	78652	76096	3.2	
3	2026-06	79894	75829	5.1	

July 2026: SARIMA vs Ensemble vs Naive Seasonal

A second, independent real-world validation window — the Ensemble outperformed both individual methods this month.

	Method	Forecast	Actual
0	SARIMA	84666	8366
1	Naive Seasonal	82509	8366
2	Ensemble	83372	8366

By Borough (March–July 2026)

Five months of real-world validation — Actual, SARIMA, Ensemble, and Naive Seasonal shown together.

Select a borough:

Barking and Dagenham

	Month	Actual	Forecast	Pct_Error	Ensemble_Forecast	Ensemble_Pct_Error	Naive Seasonal
0	2026-03	1761	1699	3.5	1731	1.7	1750
1	2026-04	1650	1625	1.5	1722	4.4	1785
2	2026-05	1830	1658	9.4	1694	7.4	1715
3	2026-06	1870	1640	12.3	1720	8	1775
4	2026-07	1874	1930	3	1847	1.4	1790

SARIMA mean error

5.9%

Ensemble mean error

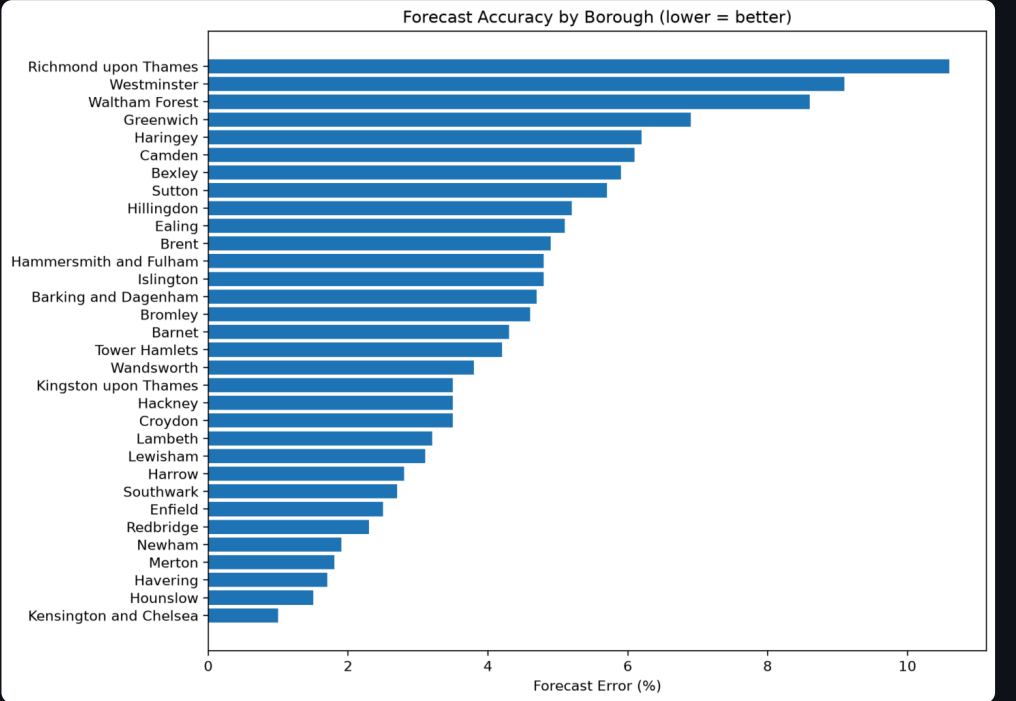

4.6%

Naive Seasonal mean error

4.9%
